

COOLPAK™

FIELD CONFIGURED RIGID ENCLOSURE

COOLPAK is a field configurable rigid enclosure that can be modified using standard woodworking tools such as drills, hole saws and jig saws.

The enclosure has a rigid ABS shell with foamed-in-place polyurethane insulation and two stainless steel latches. The thickness of the foam insulation averages 3/8" (10mm) but varies between surfaces to better accommodate various field equipment.

Minimum service temperature: -76°F/-60°C

NOTE: Heating systems are customer supplied and rely on field practice and experience.

SIZES

Model Number	L	H	W
HPCPF1	9" (229mm)	6.5" (165mm)	12" (305mm)
HPCPF2	14" (356mm)	6.5" (165mm)	12" (305mm)
HPCPG1	10" (254mm)	10" (254mm)	12" (305mm)
HPCPG2	16" (406mm)	10" (254mm)	12" (305mm)
