

MK2 MOUNTING KIT 500 & 700 SERIES ENCLOSURES

The MK2 mounting kit combines an adjustable manifold mounting flange inside the enclosure with a standard 2" NB pipe enclosure mounting socket. The mounting kits are used with Vipak 500 and 700 series enclosures.

The MK2 may be used with the Trakmount® system for even greater adjustment of transmitter and manifold position.

MK2 WITH MANIFOLD MOUNTING
